DETAILED ACTION

1. Claims 1, 2, 4-7, 9-23, 25-28, 30-50, 52-53, 55-56, 58-61, 63-66 are pending in the application.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 22-23, 25-28, 30-43, 60-61, 63-64 and 66 are rejected under 35 U.S.C 101 because the claimed invention is directed to non-statutory subject matter.

Independent claims 22, 60 and 66 are not statutory because they are not capable of causing functional change in the computer. See, e.g., Warmerdam, 33 F. 3d at 1361, 31 USPQ2d at 1760 (claim to a data structure per se held nonstatutory). Such claimed data structures do not define any structural and functional interrelationships between the data structure and other claimed aspects of the invention which permit the data structure's functionality to be realized. In contrast, a claimed computer-readable medium encoded with a data structure defines structural and functional interrelationships between the data structure and the computer software and hardware components which permit the data structure's functionality to be realized, and is thus statutory.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 1, 2, 4-7, 9-23, 25-28, 30-50, 52-53, 55-56, 58-61, 63-66 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The limitation "wherein the field specifying the type of traffic to be carried by the packet or frame includes a first type when the type of traffic is a first one of two or more available types of traffic and the field includes a second type when the type of traffic is a second one of the two or more available types of traffic" was not described in the specification.
